

Press release 11th August 2016

VENTANA expands into Austria and Sweden

Contact : cecile.fabes@ventana-group.eu

With the acquisition of O. St. Feinguss GmbH and Hackås Precisionsgjuteri AB on August 10th, VENTANA expands its industrial operations into Europe and its range of manufacturing processes to investment and plaster precision castings for all alloys (light and special steels).

- O.S.T Feinguss GmbH, based in Kapfenberg in Austria, produces components for technologically demanding markets such as aviation, motor racing, medical and defence and has been doing so for over 70 years. With 68 employees, the company turnover in 2015 was 7,5 M€ with 90 % being exported : <http://www.ost-feinguss.at/index.php/en/>
- Hackås Precisionsgjuteri AB, based in Hackås in Sweden, has produced for over 45 years high precision components mainly for the Swedish defence and medical markets. With 18 employees, their turnover in 2015 was 2 M€ : <http://www.hpgab.se/startpage/>

The VENTANA Group conceives and implements efficient manufacturing processes ([V-Solutions](#)), which are increasingly more respectful of people and the environment, for high value added metal components and sub-assemblies. The integration of these two new subsidiaries into the Ventana Foundry Division will open up new commercial opportunities for the group and allow our customers to benefit from our attractive manufacturing solutions.

*VENTANA provides mainly to the aviation, space, defence and energy industries in Europe and North America.
With now close to 500 employees and 7 factories in France, Austria and Sweden the Group turnover exceeds 50M€.
